

LOCAL NEWS ITEMS

Mr. Sherry and Mrs. Frank Emery are spending the week in Calgary.

Miss Zona Fairbank of Calgary is visiting in town.

The Didsbury U.F.A. and U.F.W.A. Constituency Association held a board meeting in Aene on Friday, July 8th and arranged for their annual convention, to be held at the Lone Pine Hall, sixteen miles east of Didsbury, on Wednesday, July 27th. The convention will open at 1:30 p.m. and is open to the public.

Jack Barber and Mrs. Barber, Mrs. Heath, Mrs. Bennett and Miss Sylvia Atkinson were Stampe visitors on Monday.

Cutting of fall rye will be started in the Carbon district next week. Considerable rye was sown last year and the stand is now around five feet high and a heavy yield is expected.

SEABE PRECIPITATION REPORT NUMBER SIX

(Compiled from 285 Rain Gauge Station Reports)

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rain which fell during the current season, the total for the year for the Carbon district is 44.7 inches. This is compared with 50 per cent for the year 1914, was 86 per cent of normal as compared with 90 per cent three weeks ago and 65 per cent for July 2nd a year ago.

The moisture condition for Alberta on July 1st was 90 per cent of normal as compared with 78 per cent at the same time last year.

FARM WOMEN'S WEEK AT OLDS AGRICULTURE SCHOOL

The farm women's week at the Olds School of Agriculture will be held August 1st to 4th. The program for four days has been arranged and lectures will be given on domestic science, sewing, home diet, preserving, home decoration, etc.

The school dormitory will afford comfortable living and meals and room will be furnished at \$1.00 per day.

Special arrangements can be made to look after children of mothers who cannot leave them at home.

CANADIAN WHEAT BOARD TO OPERATE THIS YEAR

The Canadian Wheat Board will purchase wheat from farmers in the crop year starting August 1st with out limitations placed on such purchases during the present crop year, according to a recent announcement by Prime Minister Mackenzie King.

During the present crop year the wheat board bought no wheat because of the restriction that it would only buy in case the market went below 90 cents a bushel when it was prepared to pay 87½ cents a bushel as an initial payment.

There has been considerable agitation in the wheat trade to have the board to sell to the board at the minimum price, the boards should be prepared to buy regardless of the market.

The prime minister said the wheat board will fix the minimum price for the coming crop year.

JUNIOR BASEBALL CLUB HAS ENTERED TEAM IN PROVINCIAL PLAY-OFF

Nacmine Juniors to Play Here Sunday Afternoon, July 17

The management of the Carbon Junior Baseball Club have entered the local junior team in the Provincial Junior Play Downs and games are expected to start sometime next week. The Carbon Junior Baseball Team has been going strong this year and under ordinary conditions should go far in the play downs. The local team has some good material this year and with a little more practice will be in condition to tackle the play-offs.

On entering these play downs there will be considerable extra expense and local fans are asked to give the boys their financial and moral support at the forthcoming games.

Nacmine Here Sunday

A junior baseball game has been arranged to take place at Carbon on Sunday, July 17th at 3 p.m. between Nacmine and Carbon. Tom Lett, the general manager of the Nacmine team has been asked for the calling of baseball material he chooses and the game should be an interesting one. Turn out and give the boys your support!

H. L. Ritchie is having a brace put around his left neck to the store.

Mr. J. Smith and son Roy are visiting in Drumheller and will be at the home of Mr. and Mrs. W. Poxon.

C. W. Gray left Sunday morning for Calgary.

Charlie Graham has at last completed the painting of the C.H. Nash store.

LONG YEARS AGO

July 14, 1927

Gottlieb Oshauer of Carbon won prize for the best decorated car in the opening parade at the Calgary Stampede this week, this being the second year in succession that he has carried off the honors in this event.

The storm last Saturday afternoon caused considerable damage to the telephone system between Carbon and Calgary. There were 54 poles down between Irricana and Keoma.

The Herald cup play-offs for the district golf clubs will commence on the 14th inst. at the home of the clubs from Irricana and Rockyford will visit here.

Mr. and Mrs. W.J. Gordon have returned from a trip to Eastern Canada.

The Misses Edith Bralisher and Vera Poxon will come to C.G.I.T. Camp at Sylvan Lake.

POISON ROAD ALLOWANCES

The Grasshopper plague in the Carbon district has been fairly well controlled this year and damage to lay their eggs, and unless this point is controlled now, there will be another year of hard work spreading poison.

Many farmers have done good work in poisoning along the edge of their fields and pastures, but have neglected to poison along the road allowances, and for this reason at present the grasshoppers are seen in large numbers along many roadsides.

Now that the grasshoppers are beginning to fly they will be that much harder to control, and every effort should be made immediately to get as many of the "hoppers" as possible, before they lay their eggs.

LETTERS TO THE EDITOR

The Editor, Carbon Chronicle.

Dear Sir:—Referring to the letter from J.F.O. that appeared in the issue of the 23rd of June, of the Carbon Chronicle, I wish to compliment him for the brief history of the Carbon, or perhaps, his mentor should have the compliments, as by the details given, it was very interesting. I am very glad that J.F.O. brought forward this subject, for it certainly puts the damper on the Alberta Government's S.O. publicity.

J.F.O. states: "The Union Bank left Carbon in 1914, and the Carbon citizens organized a private bank which functioned well." I am very glad that J.F.O. brought forward this subject, for it certainly puts the damper on the Alberta Government's S.O. publicity.

J.F.O. states: "The Union Bank left Carbon in 1914, and the Carbon citizens organized a private bank which functioned well." I am very glad that J.F.O. brought forward this subject, for it certainly puts the damper on the Alberta Government's S.O. publicity.

Again, J.F.O. states: "There was very little business done in Carbon in 1914, and the Carbon citizens organized a private bank which functioned well." I am very glad that J.F.O. brought forward this subject, for it certainly puts the damper on the Alberta Government's S.O. publicity.

CARBON, ALBERTA, THURSDAY, JULY 14, 1928

WEDDINGS

JOHNSON—HOLWEGNER

A quiet wedding was solemnized on Thursday, July 12th at 2:00 p.m., at the Gospel Hall, Calgary, when Margaret, daughter of Mr. Holwegner and the Misses Holwegner of Calgary, became the bride of Mr. Perry Johnson, second son of Mr. and Mrs. T. G. Johnson, former residents of Carbon, now of Vancouver, B.C. The bride was lovely in long white sheer dress with white veil, and carried a bouquet of roses and carnations. She was attended by Miss Susan Priepp.

Following the ceremony the happy young couple left for Banff on their honeymoon and on returning will make their home at Carstairs.

Both bride and groom were well known in Carbon, the former being on the post office staff, while the latter has been manager of the Builders' Hardware Store here.

THE WORLD OF WHEAT

REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

We all note with sadness that Mr. George Broomhall, admittedly the greatest expert in the world on international grain, is dead.

Mr. Broomhall was connected with wheat trade in Canada for many years before the first shipment of wheat left Western Canada 61 years ago.

He was one of our most sympathetic friends to the producers of all countries, and he was never tired of drawing attention to the difficulties of farmers had to contend with.

He ranks, in my humble opinion, in the world of agriculture, with the greatest plant breeders and agricultural scientists.

Perhaps no one would have been generally so grotesquely and insanely misquoted as the word "servant" as judged by the very highest and most ethical standards. Mr. Broomhall rendered to society a devoted and most valuable service, for his material reward in life was but a microscopic fraction of the value of the contribution he made to the welfare of the people of all lands.

Mr. Broomhall's chief claim to fame I think is that the information which he accumulated so painstakingly from the far ends of the earth, and which he made available so freely to all, assisted materially in the efficient distribution of foodstuffs from areas of surplus to areas where there was a deficiency, and so where hungry people needed food.

Following facts have tended to reduce wheat prices:

U.S. shipping returns show greater damage from frosts and rust than expected; Italy agrees to purchase wheat; Hungary sanctions Russia; European crop shows sharp increase. Large Italian fruit crop. Generous rains in Western Canada improve wheat prospects.

Of Mr. A. and his colleagues at Edmonton, the fact remains that the magic fountain pen did not work so well in those days. These men had Carbon because it did not pay them to stay here, and if J.F.O. or any of his delirious friends think otherwise, and still believe that ink is all the collateral that is behind financial success, let them take a glance at some of the wealth of some of those persons who were closely connected with the banks of the Carbon district, located in Carbon. I have no hesitations in saying that something, perhaps, they could have done with a little help from the Lord.

Now J.F.O. I will ask you a question: "If the bucket that you used to carry fuel to fill your tractor was to develop a hole in the bottom, or some other fault, would you deliberately kick in the bottom and then try to carry the fuel to your tractor in a sieve?" Well this is analogous to the Carbon district. The Carbon district, taking the place of the branch banks in Alberta, for neither scheme would be workable.

By the way, you did not answer my question. I will repeat it: "What scheme will our Alberta Government put into effect to take the place of the present branch banks? One that will have the same confidence and be as convenient and work as smoothly as the present branch banks?"

J.F. KING

ED MOODY PLEASES FANS

Ed Moody is gaining considerable popularity among the Calgary boxing fans and in a preliminary bout last Friday he won on points from cowboy Hodges of Turner Valley. According to the Calgary sports writers Ed is a colorful boxer. The following sports comment is interesting to his many Carbon friends:

"The opener was a crowd pleaser, with Cowboy Hodges leading with his chin and following up with wild swinging rights and lefts against a clever Moody who piled up points right from the start."

LITTLE ITEMS OF LOCAL INTEREST

Mrs. Chas. Graham and Jimmy left Sunday for Bentley where they will visit for the next couple of weeks. In the meantime Charlie is looking in.

Mr. and Mrs. Len Poxon and Dale returned last Thursday from Edmonton. The Misses Poxon, Mary and Marjorie Annen returned with them and will visit in Carbon for a while with their aunt, Mrs. L. Poxon.

"Buster" Simpson arrived back in town last Thursday after spending the last year at Grimshaw. He has secured a position in Drumheller with the Valley Motors.

Mr. and Mrs. C. Eriksen and Mrs. E. Sellens returned Saturday from a two week trip to the Pacific coast.

Miss Iris Laing, nurse-in-training at New Westminster, arrived last Wednesday and is visiting with her father, Thos. Laing.

Miss Annabelle Ramsay R.N. of Trail B.C. arrived Friday to spend a week with her mother, Mrs. Jennie Ramsay.

Mrs. A. Dixon is the owner of a Willys Knight car, purchased from the Carbon Auto Service.

Betty Evans had the misfortune to fall off a horse last week, breaking her collar bone.

Mrs. J.H. Oliphant and son, Bill, and Miss Norma Williamson returned last Wednesday from a week's vacation at Banff.

Dick Poole arrived home from B.C. on Thursday night and was met by all the work-weeks brother, Chas. Poole.

Mr. and Mrs. S.F. Torrance and family and Mr. and Mrs. A. McKibbin and family left Sunday for Sylvan Lake. Mr. Torrance and Mr. McKibbin returned to Carbon Monday, but their families will spend the next couple of weeks holidaying at the lake resort.

Gordon Oliphant is visiting with his grand parents, Mr. and Mrs. J. H. Oliphant.

Joyce Dishaue entertained a number of her young friends at a birthday party last Friday afternoon.

Mrs. M. J. Elliott attended the Johnson-Holwegner wedding in Calgary on Friday.

Gordon Hay left Saturday for his new home at Carbon.

Ghost Pine Sunday School held their picnic in the Carbon district last Friday afternoon, and the children enjoyed the water in the swimming pool.

The Carbon girls' softball team played at the Ghost Pine Sports last Wednesday and were defeated 15-0 by the Carbon team.

Bruce Ramsay entertained a few friends last Saturday in honor of the birthdays of his son Barry, and his niece, Mona McKibbin.

REGULAR CROP REPORT ISSUED SEMI-MONTHLY BY BANK OF MONTREAL

Shows Good Crop in Nearly All Alberta Districts

Good growth and absence of any major setbacks continue to characterize the progress of the crop throughout the Dominion. In the Prairie Provinces, where early snow wheat is now heading out over wide areas, well distributed rains have been beneficial and crops on the whole are making good progress under favorable growing conditions. In southern and central Saskatchewan, and over a large part of Alberta, stands of wheat are heavy. In southern Manitoba, an infection of stem rust has appeared, but is not serious at present, while in parts of Saskatchewan grasshoppers are active and are causing some damage.

In Alberta beneficial rains have been received during the past few days over the entire Province. Crop conditions generally are satisfactory except in the Peace River region, where a light yield is expected as a result of early drought. Wheat is heading out, coarse grains are making good progress, and all pastures are good.

Damage by grasshoppers, wire worms and rat worms is negligible.

LITTLE NEWS ITEMS OF INTEREST TO READERS

Aaron Klassen motored to Carstairs Sunday for his wife and young son. They have now moved to Carbon to reside.

Mr. and Mrs. L. Poxon and Mr. F. J. Bennett were Calgary visitors on Monday, July 14th, in the Stampe and a Red & White meeting.

Miss Molly Laing left Tuesday for an extended trip to the Southern United States.

Cyril Poxon and Miss Grace Cameron motored to Sylvan Lake Sunday and brought back P. Poxon, W. Cameron, D. Williamson and J. Gordon, who were attending Tuxie Camp.

Mrs. Ed. G. Tighe of Didsbury spent Friday and Saturday visiting with Mrs. Elliott.

Mr. and Mrs. S.J. Garrett and family spent the first part of the week in Calgary.

The Misses Molly and Iris Laing and Mrs. Laing motored to Edmonton Sunday to visit with Miss Joyce Laing who is attending Sunday School.

Norman Crompton left Sunday on the next couple of weeks holidaying at the lake resort.

Trees To The Rescue

With the drought now definitely broken over the greater part of the prairie provinces and prospects of a period of more abundant moisture apparently bright, the time appears to have arrived when further consideration might well be given to the advantages of a definite and well-considered program of tree planting throughout sparsely treed and tree denuded areas as a rehabilitation measure.

It is noted, of course, that tree planting is included as one of the items in the rehabilitation program on foot or three years ago as part of the Prairie Farm Rehabilitation program but to date comparatively little has been heard of this item, attention so far having been mainly centred on the construction of ditches, dams and minor irrigation projects.

Undoubtedly tree planting will follow in many of the districts now being served or about to be served by recently constructed irrigation schemes as a matter of course, but there are still many areas and individual farms for topographical and other reasons do not lend themselves to watering by feasible irrigation projects, but in these areas, also, there appears to be no reason now why tree planting should not be pushed about to the extent that available time and power permits.

A Valuable Aid

That trees, wherever they can be made to serve the purpose can play an important part in farm rehabilitation and can be made to go a long way, sometimes even under adverse conditions, towards ensuring sustenance on the farm has been amply demonstrated in many individual cases, as witnessed the following extract from the annual report of the Canadian Forestry Association, dealing with southern Saskatchewan conditions:

"Every district visited furnished striking proof of the possibility of the southern farmer becoming so far as his food supplies are concerned. Had the farm garden been a universal policy instead of being completely overlooked, or at best, in most cases, a haphazard venture, countless millions in food costs during the past nine years could have been avoided. Every farmer can grow his own needs anywhere throughout the south country, and no objective short of this is good enough, and nothing but sound educational progress can achieve it.

"At Piapot, on the main line of the C.P.R., in an area of nine families of wheat, we visited a man who inside his house raised all his own needs this year—250 bushels of potatoes, all vegetables, many jars of small fruits, melons and even pumpkins and apples. Every farmer in that area could have done the same had he a few years ago given the need of such things proper consideration."

Can Supply Requirements

Whether or not the Piapot farmer referred to in the foregoing extract had sufficient water available for his garden to take the place of rainfall during years when moisture was not sufficient to raise wheat crops, the Forestry Association's report does not say, but it does at least demonstrate that in years of normal precipitation every farmer in the country could supply his own table requirements practically the year round, provided he had the requisite shelter in the form of trees and shrubs.

It is too late, of course, to plant trees this year, but it is not yet too late to prepare soil for a shelter belt to be planted next year; indeed, that advance cultivation and preparation is a requisite step in successful planting. This, as no doubt, most farmers know is stressed by the authorities of the Dominion Forestry farm who supply millions of trees free to farmers throughout the west every spring.

Mortality among mis-planted trees in the drought areas of the west has been high during the drought period, but, at the same time, it is surprising how many trees have, with some care and attention, withstood the ravages of a long period of dry weather. They have not made much tree growth, it is true, but they have rooted deeper and deeper to reach the dwindling moisture reserves and now these trees are responding again to more copious precipitation.

Opportunity Again Here

The experience of others demonstrates that the mortality of the drought years need not act as a deterrent to the planting of trees on the farm. On the contrary it goes to show that, even during a dry period, they are of immense benefit and with the drought now presumably broken it should afford every encouragement to the individual farmer to take active steps to provide at least for some of his needs in future years, by establishing a good shelter belt at the first opportunity his circumstances permit.

It should further be pointed out that there are many farmers, even in the drought area, who had sufficient water to maintain a garden, if in earlier years they had provided the necessary shelter for vegetables and fruit trees. This extension can now be repaired in many cases and with the return of a period of greater precipitation it looks as if the time has arrived when shelter belts should be planted more abundantly.

Full Operation Delayed

Shortage of equipment has held back full operation of Trans-Canada Air Lines, Inc. C. D. Howe, minister of transport, told the House of Commons today that the airline will not be in full operation of passenger, mail and express services between Vancouver, Toronto and Montreal.

South Africa may compel commercial travellers to pay for use of the roads.

It is thought that the Mississippi river valley once was a great interior sea.

Barbed Wire Lost

Fifty-Mile Fence To Be Built in Palestine

Nearly \$100,000 is to be spent in Palestine in constructing a barbed-wire wall along the frontier where Lebanon, Syria and Trans-Jordan impinge upon Palestine in the hope that Tegar's wall, named after Sir Charles Tegar, its prime advocate, may be effective in keeping smugglers, agitators, gun runners, terrorists and fugitives from justice from using the border zone as a base of operations.

A despatch to the London Times from Jerusalem says that specifications of the plan call for 50 miles of barbed-wire fence, varying in construction according to local conditions. The standard barrier apparently will consist of two parallel fences six feet high and five feet apart.

Each of the fences will have meshed wire at the bottom and barbed-wire above, and the space between the two fences will be criss-crossed with barbed-wire and filled with loose masses of wire. Where the conditions call for an even more formidable barrier than this there will be three parallel fences—New York Sun.

Protect The Birds

Are Dependable Allies Of The Farmer In Destroying Insect Pests

Birds are the farmers' and gardeners' dependable allies in combating insect pests. Those observers testify that most birds eat insects and many eat practically nothing else. The insects, native sparrows, larks and wrens scratch the surface of the soil for their food. The woodpeckers dig carefully under the bark of trees, digging into tiny cracks and openings to drag out burrowing larvae and hibernating insects.

The flycatchers and warblers are to be seen sitting on high places ready to snap up the long-living insects. While the nightingales and snowbirds find their living in the higher atmosphere.

The number of insects destroyed by birds is quite beyond calculation. Few birds are entirely beneficial but there are few indeed that are entirely harmful. Perhaps the worst of these are starlings, which are becoming excessively common in places, and the English sparrows, which these birds should be destroyed, for not only do they harm the crops but they chase away and destroy the native birds.

Treasure Hunt

New Attempt To Salvage Wreck Of Boat Which Sank 138 Years Ago

The first stage in the new attempt to save the treasure in the wreck of the H.M.S. *Lutine*, which sank 138 years ago at the entrance to the Zuider Zee, has been accomplished. The largest diver in the world, the Karamata, which has 131 scuba tanks of special steel, each of which cost £100, has been lowered from the yard at Kinkerdijk, near Rotterdam, to Terschelling.

Before the diving begins the remains of the wreck of the *Lutine*, which made an unsuccessful attempt last year, will have to be removed. Diving depends on a spell of favorable weather during the next two months.

Mr. Van der Broek, general manager of the Billiton Mining Company, has said that the *Lutine* was lying on a bed at a depth of about 50 feet beneath the level of the seabed with about 40 feet of sand on top of her, which is the first purpose of the diver to remove. The sea at that point is about 1½ fathoms, which corresponds to the draught of the Karamata—London Times.

Fame Has Passed

Canadians at London's Dominion Day dinner learned the small room in the shadow of Westminster Abbey where their country's constitution, the British North America Act, was finally drafted more than 70 years ago had become a ballroom.

Berries of poison ivy are smooth and green, later turning yellowish white.

Wheat Market In Europe

Want To Accumulate Reserve Stocks In Event Of War

Foreign trade experts of the United States agriculture department said that unsettled political conditions in Europe might open new and larger markets for surplus American wheat during the next 12 months.

Prospects for larger sales in Europe were indicated, they said, by the recent decision of Great Britain and The Netherlands to accumulate reserve stocks of the grain in preparation for a possible outbreak of war.

Foreign trade authorities said that European powers were known to be considering similar action. The Netherlands has begun establishment of a system for maintaining at least two months' supply of wheat at all times. Grain importers and dealers would be held responsible for maintaining such stocks with subsidiary assistance from the government. Little is known about the British plan.

Trade experts estimated that European wheat imports for consumption during the next year would be about 40,000,000 bushels. About 50,000,000 more than during the last 12 months. Reserve stocks were not included in the estimate.

The proportion of possible reserve purchases of wheat in America would be largely in price, officials pointing out that the American prices were above the world level.

Official crop reports indicate that Canada and Argentina may produce 125,000,000 bushels more than last year. Trade experts said that probably would be sufficient to meet the most optimistic increase in world import requirements.

Must Develop North

Should Be Utilized To Hold It For The White Man

Canada must develop and utilize its northland to hold it for the white man. As Albrecht, superintendent of the Dominion experimental farm station, Beveridge, Alta., warned the annual meeting of the Canadian Association of Scientists in annual convention.

Like Russia, Canada must look to its north and the United States will follow its progress with satisfaction, he said. "For a particular reason of our own very proper concern."

The United States must be interested in the Dominion's conquest of the north. The modern age of racial expansion, in the mad quest for economic self-sufficiency, in the race of armaments and in the mad scramble for a place in the sun, which seems often to mean territorial expansion, is it to be supposed that the northern third of this continent can be held by the white man unless developed and utilized by him? What of Asia?

SELECTED RECIPES

FRESH CHERRY JELLY-TARTS

1 cup sugar
1 quart fresh sour cherries, pitted
1 package Cherry-Jell-O
1 cup hot water
1 cup cold water
1 cup milk
1 baked 3½-inch tart shells

Add sugar to cherries and let stand 10 minutes. Measure cherries in hot water. Pour over cherries. Chill until thick. Pour into tarts. Fill 4 tablespoons thickened Jell-O into whipped cream. Chill. Place layer of whipped cream in bottom of each tart shell and chill about 10 minutes. Cover with layer of pitted cherries, pressing stem-end of each cherry lightly into cream. Add thickened Jell-O to fill shell. Chill a few minutes longer and serve plain or with topping of additional whipped cream. (Custard cream filling may be substituted for whipped cream in bottom of tart shells.)

MELON AND RASPBERRY SALAD

1 package Lemon-Jell-O
1 pint hot water
1 cup orange marmalade or honeydew
1 cup hot water
1 cup fresh raspberries
Dissolve Jell-O in hot water. Chill. When slightly thickened, fold in marmalade and raspberries. Turn into ring mold. Chill until firm. Unmold. Serve as is.

For Sea Supremacy

Soviet Russia Plans To Surpass Britain In Naval Construction

Soviet Russia believes she can challenge Great Britain for supremacy in the quality of its naval construction. It became known with publication of a speech made at Leningrad by Mikhail Kalinin, president of the Supreme Soviet.

Addressing workers at the Ordzhonikidze naval construction plant at Leningrad, Kalinin declared: "I believe that at present our engineers, technicians and construction specialists should be able to accept the task of surpassing Great Britain in quality of naval construction. Hitherto no one has surpassed Great Britain in naval construction but we are going to surpass her."

The Spirit Of China How The Language Grows

Words Colored By Inventors Soon

In June, 1917, a war year for the United States, the present Mme. Chiang Kai-Shek, as a daughter of the famous Chinese Song family was graduated from Wellesley College.

June 18, 1938, Mme. Chiang's classmates held an annual reunion on the shores of Lake Wunan. But 1938 is a war year for China, and Mme. Chiang could not attend.

Instead she sent a gift of silver spoons, which were used at a reunion. While she sent a message that through her gift she would feel that she was sharing in the festivities, she added that the spoons were to show that a spoon may be licked, but China can't.

Mme. Chiang's patriotism is characteristic of the new China which she and her generalissimo husband have helped to build, a new China which with old stoicism is doggedly defending itself in a war still unending. Her humor and love of subtle parable are likewise characteristic.

The western world should realize that these racial traits are not the least important of the weapons with which China fights an aggressor—Detroit Free Press.

Two Generations Back

Queen Elizabeth's Grandfather On Mother's Side Was A Minister

From the rectory to the throne in two generations is the history of Queen Elizabeth's family, says W. I. Clarke, in the Windsor Star. Her Majesty's mother, the Countess of Strathmore and Kinghorne, who died recently, was the daughter of the late Rev. William Cavendish-Bentinck.

From the manse to the vice-regal post of Governor-General of Canada has been made in one generation by Lord Tweedmouth, who is the son of Rev. John Buchanan of Scotland.

The surest way to make a postage stamp stick is to put the wrong address on the envelope.

Standard QUALITY Tires
FROM the day it was introduced, the Firestone Standard Tire has more than lived up to its name. Built to the highest standard of the value. Thousands of car owners in all parts of Canada enthusiastically endorse it as the greatest the Firestone ever built to sell at low prices.

Firestone Standard Tires give you everything you need—long mileage, extra safety, carefree, dependable service and economy. See the nearest Firestone Dealer today. Take advantage of Firestone's new low prices and equip your car NOW.

Firestone
MOST MILES PER DOLLAR

WORLD HAPPENINGS BRIEFLY TOLD

Lord and Lady Tweedsmuir will arrive in Vancouver Sept. 3 to commence their tour of British Columbia, civic officials said.

Last stronghold for men in the British Broadcasting Corporation staff, the research department now has been invaded by women appointed as secretaries or typists.

Captain Ambrose Norris, 56, of the Pioneer Granite, out of St. John's Nfld., was washed overboard at the mouth of Trinity bay. His body was recovered.

Western Canada's war on the grasshopper may be headed some day by a little bee-fly from the Argentine, being experimented with now in the Dominion entomological department's laboratory at Belleville, Ont.

Appointment of D. H. McCallum, Regina, as chief dairy instructor and inspector in the dairy branch of the Alberta department of agriculture was announced by H. B. Miller, minister of agriculture.

According to the China Weekly Review 3,500,000 Chinese boys and girls are being trained for war by national resistance camps, the boys as soldiers and the girls as nurses and other aid.

To avoid service in the National Guard, Carl Winkler, 24, Detroit, chopped off his right hand with an axe, police said. Winkler joined the Guard a month ago, and attended two meetings.

Collection of income tax for the three-month period April 1 to June 30, 1938, amounted to \$10,521,476 compared with \$8,758,609 in the corresponding period of 1937, a net increase of \$1,762,867, the national revenue department announced.

New Insulin Treatment

Old Indian Herb Remedy Reported

By R. C. Foy
Discovery of a new possible source of insulin, arising from experiments by two British Columbia physicians with an old Indian herb, was reported in the current issue of the Canadian Medical Association Journal.

The new extract, it developed, will eliminate hypodermic injections, said article by Doctors R. G. Large and H. N. Brockelby, both of Prince Rupert, B.C., who are doing research work on the roots of the "Devils Club," a shrub that grows wild in great abundance along the coast of British Columbia.

Made by boiling bark from the plant roots, the extract gives "remarkable" results in reducing the sugar in the blood of a test group of diabetic rabbits, the article said. The extract, unlike insulin, which necessitates hypodermic injections, is taken through the mouth.

"Our attention was drawn to this material," the article continues, "through the examination by one of us of a surgical patient with emphysema, developed marked symptoms of diabetes."

"This person, it was learned, had kept in apparent good health for several years by oral doses of an infusion of this bark root, and in fact still leading a normal life with the aid of this infusion."

"Such a preparation has long been used by Pacific coast Indians, though for what specific purpose is not clear," the article concluded.

Complete Long Motor Trip

Three Englishmen Followed New Route From India To England

Three young Englishmen arrived in London from Delhi, India, after a 6,500-mile drive in an automobile that cost them \$70 and took them over a route never before attempted in a car.

The men, Captain C. W. Griffin of the Royal Engineers, Capt. G. W. McKinnis of the Royal Staffs, and O'Brien Thompson, an engineer, spent two months on the road, repaired one broken axle and three broken springs and stayed with natives in mud huts and tents.

Once they thought they were stopped by a seasonal river 100 feet wide and four feet deep. But coolies helped them dismantle the car and carry it across to the opposite bank where they re-assembled it.

Not That Kind

In Scotland children habitually refer to a slice of bread and jam as a "piece" and women talk of taking a "piece" for their dinner-hour. This vernacular use of the word led to some confusion at the Empire Exhibition the other day. A married visitor inquired of a girl attendant the way to the Peace Pavilion and was diverted on being asked "is it sandwiches you'll be wanting?"

Connecticut first raised tobacco between 1849 and 1866.

Makes Faces For Living

Puppets And Marionettes In Clay Is One Woman's Business

Miss Meta K. Hannay of Boston loves to make faces. She has made 37 so far and could, she says, go on making them forever.

The faces are not mere contortions of the features, however, but masks for marionettes. Puppet faces undergo six processes before completion. These include modelling from clay, baking and painting, by hand.

Though not two are alike, each set is interchangeable. For example, the same face will serve for Cassius, Ethelred, Crane or Peter Quince.

Simplicity and space-saving are paramount virtues in puppeting. Miss Hannay thinks.

She is able to construct a light, workable stage in a few minutes. She saves old sheets and dyes them in pastel colors for curtains, paints her own backdrops on cardboard and can evolve lighting equipment from a string of Christmas tree bulbs. She is even iconoclastic enough to dispense with the wooden "control" to which the marionette's strings are usually attached.

Miss Hannay also makes "fast puppets," which are worked by the fingers. She has a complete Punch and Judy show of this sort, with capes and hoods made from old socks collected from neighbors.

The Government has emphasized that "in an emergency the continuing distribution of newspapers would be a vital factor in maintaining public morale."

To live, newspapers have not taken any special precautions, but one of the largest newspaper distribution companies of the city has an elaborate program.

Truck drivers and their assistants taking papers to railroads must wear clothing which will give reasonable protection against gas. Cheap wrapping paper will be used on bundles, to be discarded if contaminated by gas. Ten per cent. of the plant staff of 5,000 people will be highly trained in anti-gas, fire and first-aid work.

Field telephone have been acquired against a breakdown in the normal public service. Storm and bicycle antennas have been provided should public lighting fail.

Alternative space has been arranged for every department so that the landing of a bomb will not disrupt the organization, and bedroom and canteen service will be ready to accommodate workers held in the building by a prolonged raid.

The basement of the Central London building, several acres in extent, is being completely gasproofed as a shelter for the entire staff. Anti-aircraft arrangements are being completed in all the firm's branch offices throughout England.

It is suggested also that power private wire systems be used as an auxiliary if a raid should damage the Post Office works. The latter are being protected in many technical ways against destruction by bombs, with specially constructed buildings, duplicated services, and routing diagrams for connections around a damaged area.

Yes, London looks absurd—but to what? Miss, famous as the latest cat in the world because it would not get up to lap a saucer of milk, but instead dipped in its paw then licked the paw, has died in Odense, Denmark, birthplace of Hans Christian Andersen the fairy-tale writer.

A leading American manufacturer of white polish for shoes is so insistent on the purity of its ingredients that periodically he has his chemists brush their teeth with it.

Pattern 4812 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 14 takes 24 yards 29 inch fabric. Band twenty cents (20c) in color (stamps cannot be accepted) for this Anne Adams pattern. Write plainly. Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg, Newspaper Union, 175 McDermott Ave., Winnipeg.

The Earhart Light

Marys Thy Howland Island Missed By Famous Flyer

A monument on a desert island and a prosaic ruling which established legal death, stood as reminders that just one year ago Amelia Earhart and Frederick J. Noonan vanished trying to fly across the vast South Pacific.

On tiny Howland Island, 1,500 miles southwest of Hawaii, a bone-white lighthouse tower—the "Earhart Light"—marks the spot at which the aviators missed on a hazardous leg of her world flight.

The largest battleship in the world, the Hood, is now commanded by a man with only one arm. He is Capt. H. C. C. Woodhead, who had his arm shot away while storming the Mole at Zebruggia in 1918. He is an old Osborne boy, whose last ship was the cruiser Cassin.

There were 3,000 coffee houses in London in 1675.

CUSTOMER (departing with hotel silver): "What? Aren't they silver?" —Marianne, France.

To Protect Newspapers

Distribution Company In London

Editor & Publisher, New York, says they now have an A.R.P. office in London—Air Raid Protection. They gather from a piece in the News-Paper World—which is mightily concerned with the welfare of journalism in the event of a hostile air attack.

The Government has emphasized that "in an emergency the continuing distribution of newspapers would be a vital factor in maintaining public morale."

To Encourage Business

Should Lighten The Burden Of Taxation To Stimulate Trade

In its revision of the income tax law, Ottawa has offered employers who establish pension plans for their employees a credit on future income tax for the lump sum payment that is usually necessary to provide for other employees.

This is all to the good, but Ottawa might well have gone a great deal further and provided a basic income tax.

It should lighten the tax burden on industry generally and thus pave the way for a profitable prosperity that would be a basic income tax.

There are few better ways of helping people to help themselves than to encourage group insurance and pension plans. Such plans make employer and employee partners. They give security, a stake in the community, and, above all, a sense of standing on one's own feet.

That is a great deal better than relief, old age pensions and the rest of it.—Toronto Financial Post.

Steadied In World

Australia's Marriage Rate Has Not Changed In 30 Years

Statistics reveal that Australians are the most stable marrying people in the world.

Neither the World War, the modern pace of living nor economic crises have changed their ideas on the subject and their marriage rate is the same as in 1908.

The latest figures show 8.4 marriages per 1,000 of population. The only countries with a higher marriage rate now are Russia, South Africa, Germany, Denmark and Rumania, Italy is lower.

Got His Picture

But Effort Put Candid Camera Man In Hospital

The candid camera craze put Jack Bartlett, 46, Salt Lake City, in a hospital. Motorcycle Patrolman E. N. Olsson said he agreed to let Bartlett take a "head-on" picture of his own photograph got excited as Olsson's motorcycle approached. He attempted to dodge, so did Olsson. Bartlett suffered a brain concussion.

P.S. He got the picture.

"The amateur conjurer is not to talk too much when performing a simple trick," says a professional. Nevertheless, a polite audience must pretend to enjoy the patter of his little feat.

Show-off children, according to an educator, just show up their parents.

THE NEW ROYAL RANGE

Above is a picture of the new high-speed Royal Range, photographed as it completed its official trials at Portsmouth before being used by the King when he visited the Home Fleet recently.

SUNDAY SCHOOL LESSON

JULY 17

DEBORAH: EMERGENCY LEADERSHIP

Golden text: Who knoweth whether thou art not come to the Kingdom also at this time as this? Esther 4:14. Lesson: Judges 4:1-5:31. Devotional reading: Psalm 4:6-13, 8-11.

Explanations And Comments

Israel Oppressed by Sisera, Captain of Jabin, King of Canaan, Judges 4:1-5:31. Joshua's conquest of Canaan was incomplete, and many cities remained in the possession of the original inhabitants. There was a federation of the tribes against their common enemies within and round about it was a rude rough age, "Israel's Iron Age," as Dr. Marcus Dods aptly terms it. Several times a powerful empire threatened to annihilate the Israelites, but each time, as the Judges who saved them out of the record says, "Jehovah raised up land of them that despoiled them."

A great crisis then came, Jabin, King of the north, conquered the Canaanites, through Sisera, his commander-in-chief, had held for 20 years a military despotism over the northern district of Canaan. Nine hundred chariots of iron had him. There was danger that his power would be required to crush the Israelites and sealed Sisera's doom.

Challenge. Deborah, a prophetess, Judges 4:4-7. "Here was a weak and feeble Israel, whose future was of immense consequence to the whole of the Jewish race. It was a crisis, a mighty spiritual destiny, and in danger of just ceasing to be anything at all under a pessimistic view of what they were meant to be."

They broke: those who were driven across their very soul. If ever there was a time when the Israelites were so near to their doom as this, it was now, Sisera is too strong for us; we have only God soldiers, poor as they are, we should rise against Sisera, he would only ride up down the mountain directly. And when the men were of no use at all, would the Israelites be the use of God? (Gaius Glenn Atkins).

There was a woman, Deborah, a prophetess, and the judge of Israel at that time. She was accustomed to sit under a palm tree (therefore known as the palm tree of Deborah) and the judges came to her for judgment in national affairs, and to settle their domestic quarrels.

With faith in God's directing hand such an empowered Joan of Arc for her time, Deborah summoned Barak and ordered him to raise a force of 20,000 men from the tribes of Naphtali and Zebulun and attack Sisera and his chariots and his army at the River Kishon. Only those two tribes were called upon to do this, because they were the most interested in defeating the oppressors, for their territory lay between the river and the Sea of Galilee.

"And I will deliver him unto thee," Deborah said, speaking in the name of Jehovah.

With faith in God's directing hand such an empowered Joan of Arc for her time, Deborah summoned Barak and ordered him to raise a force of 20,000 men from the tribes of Naphtali and Zebulun and attack Sisera and his chariots and his army at the River Kishon. Only those two tribes were called upon to do this, because they were the most interested in defeating the oppressors, for their territory lay between the river and the Sea of Galilee.

"And I will deliver him unto thee," Deborah said, speaking in the name of Jehovah.

A Geographical Term

In Reality Place Named Budapest

Does Not Exist

The name "Budapest" is an abstraction; it is purely a geographical and administrative term, meaning the Hungarian capital. In reality, it does not exist. There is only the right side of the Danube River called Buda, and the left called Pest. The distance between the two banks is about 700 yards. Buda is 500 years old; Pest is about 200. A lovely old bridge spans the river, and the man who built it was an English engineer, Adam Clark. His name is conspicuous in the city's history, for he began; but in Buda there is a beautiful Old-World square called after him. Pest is pronounced "Pesh."

Playing For Time

Every Day Is Postponed Matter

It Less Likely

As President Beneš of Czechoslovakia says, time works for peace. Every day of postponement must bring more careful calculations of chances, every day of preparation shows the picture of war in a more terrible light, and every new addition to the horrors of current wars helps to consolidate in the public opinion of the democratic nations against the aggressors. War may still come; it is avoided, the world will owe thanks to the statesman, who, in the face of bitter conflict, secured it time to think.—Toronto Telegram.

Who Are The Foreigners

There is a local statistic which forbids the sale of foreign goods to Americans in San Francisco's Chinatown.

A new reporter laughingly tells of an incident which occurred during a Chinese New Year celebration. He wished to obtain some photographs of a Chinese girl holding strings of the firecrackers; so he dashed into a nearby store and loudly gave an order for them.

The portly Chinese in charge of the shop shouted back just as loudly, "We do not sell firecrackers to you, you know."

(Which sounds something like the voluble reporter who said to the big "Chief" who had just come in to visit the Chicago World's Fair, "Well, Chief, what do you think of our country?")

Less than 2,000 of England's 70,000 blind are under 16 years old.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. MCULLOUGH

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to The Health League of Canada, 103 Bond St., Toronto, Ont.

Always Gets It Back

Conductor Has Lent Thousands Of Dollars To Passengers

History has it that a party named Ebenezer, who conducted an exhaustive but vain search for some honest folk. It seems a pity that Ebenezer's case so long ago because there was a conductor named Ebenezer who could have put the lantern-bearing ancient on the right track by pointing out passengers on a railroad train.

The modern conductor is John L. Reese, who in his 42 years of service with the New York Central System has lent thousands of dollars to financially embarrassed train riders, and has never lost a cent of his investment in faith in human nature.

During the Century of Progress Exposition, for example, Reese advanced the means of 17 persons to get back home. Various events brought him 27 to their predicament, such as a lost purse, a picked pocket or perhaps too grand a time for the extent of the excursion.

"They'd come up to me at the gate in the La Salle Street Station," said Reese, who is a conductor on the Twentieth Century Limited, and ask me how they could get home. I'd tell 'em to get on the train—and I'd advance the fare. They all returned the money to me, with nice letters of appreciation."

When the American Revere lent \$300 to a woman who was on her way to California from New York, she had exhausted her funds for his passenger cash enough for breakfast. Reese took care of that, hurried around among his friends in the station and gathered \$300 for his passenger.

"She wanted to give me a couple of diamond rings for security," Reese related. "But I didn't want to be bothered. A few days after I had the money back with an extra \$50—and when I was in California a big letter was my disposal."

Runaway youngsters, old ladies carried past their station or on the wrong train, like the one who became confused at Elkhart and took the Century thinking she was going to Chicago, "old road" long train which stood alongside—Reese has dug into his pockets hundreds of times to ease her. And never reason to regret it.

U.S. Military Aircraft

Claim Made That It Is Superior To Rest Of The World

The United States army, placing a \$144,396 order for 98 fighting planes, took occasion to claim that the United States is superior to the rest of the world in designing military aircraft.

The planes ordered included 35 fighting machines such as few in February to Buenos Aires and return, 75 smaller bombers and seven streamliner attack planes.

The planes are the first to be purchased out of the \$43,000,000 Congress gave the Air corps to buy 478 aircraft in the new fiscal year. About 700 new craft already were on order.

The army has some 1,400 first line planes in service now and expects to reach its goal of 2,320 of the most modern types two years hence, officials said.

A Real Expert

Two maids were conversing over the back fence of the suburban house.

"I'm going to have my eyebrows plucked," said Tilly. "It's the fashion now, you know."

"No," said Tilly, putting on a refined air, "my boy friend who works at the poultry shop down the road is going to do it."

"Karl? 'So your baby is sick. What seems to be the matter with it?'" Jack: "Almost everything, I guess, except sleeping sickness."

HON. R. J. MANION IS NEW LEADER OF CONSERVATIVES

Ottawa—With a new leader, a revised policy, a new name, the National Conservative Party of Canada moved on to another stage in its history which coincides in time and event with the history of the Dominion since Confederation.

The new leader is Hon. Robert James Manion, who brings to the office of opposition chief in Canadian politics experience gained in a varied career in medicine, war, politics and literature.

"I am your leader; I am not your commander," Dr. Manion told delegates gathered from every federal constituency, just after his selection from a field of five.

He pledged himself and his abilities unreservedly to the service of the party and the nation and invited cooperation and support from all.

The election culminated a three-day convention in which the party organization was revamped, the name changed from "Liberal-Conservative" to "National Conservative" and a series of resolutions embodying party policy adopted.

Only two ballots were required to give Dr. Manion a majority over the four candidates—Dr. H. B. Pherson, of Regina; Joseph Harris, Denton Massey and Hon. J. Earl Lawson, all of Toronto.

His chief opposition came from Mr. MacPherson who entered the race at the last minute and on the first ballot rolled up a total of 475 votes to Dr. Manion's 726.

On the second ballot the low man, Mr. Lawson, with 248 votes, was out and the two leaders both increased their strength at the expense of the other two.

Dr. Manion's total rose to 830, more than half the total and ample to elect him. Mr. MacPherson's rose to 648 and Mr. Harris and Mr. Massey, who polled 311 and 128 respectively on the first ballot, were tied at 46 each on the second.

These votes were divided approximately as follows: Yukon, seven; British Columbia, 10; Alberta, 10; Saskatchewan, more than 70; Manitoba, 115; Ontario, more than 600; Quebec, more than 400; New Brunswick, more than 70; Nova Scotia, more than 70; Prince Edward Island, 35.

Dr. Manion won the leadership by a margin greater than Dr. H. B. Bennett at the 1927 Winnipeg convention, although the latter vote was practically the same. On the first ballot at Winnipeg Mr. Bennett polled 594 votes against 245 for Hon. Hugh Guthrie, his closest rival.

On the second he polled 780 and won. One other difference was that at Winnipeg all five losing candidates lost votes to Mr. Bennett on the second ballot while here Dr. Manion and Mr. MacPherson shared the vote.

With the cooperation of the party followers Dr. Manion predicted a victory for the party at the next general election which, he warned, "may mean up on to like it or like it the night."

The Mackenzie King government, he declared, was "on the slide." It was "a do-nothing government."

Prime Minister Mackenzie King could not do anything to save his administration. It was headed for defeat just as surely as Conservatives were in 1935.

Dr. Manion himself was a victim of that defeat for he lost his seat for Port William to a Liberal candidate. However, he was assured of a chance to re-enter the house when Mrs. George Black, one of the two women in the House of Commons, resigned, as she would resign her seat for the Yukon in his favor and ask Prime Minister King to give the new leader an appointment.

Gold Taken Off Lineer
Rimouqui, Que.—Removal by tug from the damaged liner Arcadia, stranded near the spot where she struck bottom recently, \$1,500,000 in gold was taken ashore at Father Point and loaded on a train for Quebec, where it was re-shipped to London.

Elevator Destroyed
Lethbridge, Alta.—Fire destroyed the Alberta Pacific Grain Company elevator at Woodhouse, 35 miles northwest of here. Between 800 and 900 bushels of wheat burned. Cause of the fire and total damage have not been determined.

Tourist Income
Halifax—Gross income from Canada's tourist industry last year was \$30,000,000. Resources Canada, T. A. Crear said on his arrival here.

Outbreak In Shanghai

Bullets Create Turmoil

Shanghai—Exploding bombs and assassins' bullets entered in the first anniversary of China's armed resistance to Japanese invaders and threw the International Settlement into turmoil.

Three bombs were thrown simultaneously at a Japanese restaurant on Garden Bridge, a floating restaurant off the Bund—now used as Japanese government headquarters and the Yokohama Specie Bank branch, also on the Bund.

One Chinese was killed and another wounded.

Police reserves and foreign defense units were called out to guard against more serious outbreaks of terrorism in China's commercial capital.

A cordon quickly was thrown around the foreign area, blocking all traffic between the International Settlement and Japanese-occupied territory.

An unidentified Japanese riding a bicycle in the International Settlement was shot and killed. His assassin escaped.

A Japanese-occupied West Hongkong, a part of Shanghai, a Japanese center was shot and killed by three Chinese who threw a hand grenade at a Japanese sentry post on the Yuyehing road bridge, linking the settlement with Hongkong.

Several bombs were tossed against a Japanese cotton mill on the settlement outskirts, and a few moments later a Japanese cotton mill exploded in the mill's living quarters. One British Sikh soldier from Japan was wounded.

Japanese reported new gains over Chinese armies defending the Yangtze river approach to Hankow. Chinese provisions, cables and goods of Japanese campaign.

The year has cost China 500,000 of her best troops, parades of 10 provinces, most of her coastline with its ports through which flowed revenues, the Yangtze river—but it has produced goods. It has cost her control of two-thirds of her railroad network and her greatest chance of commerce, the Yangtze river—but it has not brought China to her knees.

China derives hope from Japan's failure to take the last step in the initial clash outside Peking last July 7. Hope also springs from Japan's failure, after bringing the Chinese army at Shanghai and driving the government from its capital at Nanking, to obtain a dictated peace. Finally, there are China's repeated failures to break China's united front.

The Chinese Nationalist party, Kuomintang, is working as a unit under the leadership of General Kai-Shek.

After a decade of efforts to discredit Chiang and his government, the Chinese Communists, who are political agitators and guerrilla fighters to prevent Japanese consolidation of gains in Shanghai province.

So far China has dipped only sparingly into the currency reserves she built up before the war. Another factor may force her into these reserves, unless loans and credits are obtained abroad.

Must Import Grain

Britain Will Have To Depend On Empire For War Time Provisioning

London.—The government is determined to aid domestic agriculture to the fullest extent, but war-time provisioning of the United Kingdom must ultimately depend upon supremacy of the royal navy, Prime Minister Chamberlain told a parliamentary delegation.

The group called upon Mr. Chamberlain at the House of Commons to seek an explanation of a disputed passage of his speech at Kettering, in which he warned any attempt by Great Britain to grow all the food it needed would ruin those "empire and foreign countries who are dependent on our markets."

The prime minister prefaced his remarks with an expression of gratitude for the opportunity of clarifying certain areas of interpretation he claimed had been made by critics of his speech.

To increase whatever the efforts to grow home production, the nation could not "reasonably" count on British self-sufficiency in foodstuffs.

The prime minister prefaced his remarks with an expression of gratitude for the opportunity of clarifying certain areas of interpretation he claimed had been made by critics of his speech.

To increase whatever the efforts to grow home production, the nation could not "reasonably" count on British self-sufficiency in foodstuffs.

The prime minister prefaced his remarks with an expression of gratitude for the opportunity of clarifying certain areas of interpretation he claimed had been made by critics of his speech.

WESTERNER WINS SUPPORT

4,000,000 Ready To Escape Nazi Rule

If New Homes Can Be Found
Erich Less, Paris, France—An Austrian refugee leader told United States delegates he believed 4,000,000 Austrians would flee Nazi rule at a 32-nation conference called last month in a new homeland.

Arthur Rosenberg, representing the Federation of Austrian Exiles at the meeting inspired by President Roosevelt of the United States to try to help German Jews and refugees, said about 75 per cent of Austrians would leave their country if allowed to take a substantial part of their property with them.

(The Austrian population in the 1934 census was 6,700,233. Various estimates put the number of Jews in Austria at the time of the Austro-German union at 200,000 to 300,000, and the total number of persons with some Jewish blood at 600,000—roughly 10 per cent of the population.)

The United States delegation, headed by Myron C. Taylor, former head of the United States Steel Corporation, took the lead in preliminary negotiations for settling the refugee problem—made acute by the Austro-German union March 13.

PLAN TO TRAIN ROYAL AIR FORCE PILOTS IN CANADA

London.—Sir Kingsley Wood, secretary of state for air, told the House of Commons that arrangements were being made for an officer to be sent immediately to Canada to explore the possibilities of working out a scheme for the training of Royal Air Force pilots in the Dominion.

Sir Kingsley made this statement in reply to a question asked by the secretary of state for air, told the House of Commons that arrangements were being made for an officer to be sent immediately to Canada to explore the possibilities of working out a scheme for the training of Royal Air Force pilots in the Dominion.

Automatic Observations At North And South Pole Predicted For The Future

Establishment of automatic robot weather observers at the North and South Poles, on mountain tops, and on isolated islands to predict the weather for a week or more was forecast by Dr. W. R. Gregg chief of the U.S. Weather Bureau.

Addressing the American Association for the Advancement of Science at its summer meeting, Dr. Gregg declared a new type of international scientific co-operation is emerging between Democratic, Fascist, Communist and other forms of governments to make the earth's weather less of a hazard in carrying on human activities.

The newest instrument for gathering weather data is the radio meteorograph, a device sent aloft by balloon which automatically registers its height, humidity of the air and temperature as it ascends into the stratosphere five miles and more above the earth's surface, Dr. Gregg declared.

Plans are already being made, he declared, to set up robot weather observers near the North and South Poles, on mountain peaks, and on isolated islands near the equator to make similar automatic weather observations and send them by radio to a central weather observatory for transmission to all parts of the world.

Such automatic weather stations, which would make observations of atmospheric conditions, would be powered by electric batteries and would require rare inspections by passing ships or aeroplane visits, Dr. Gregg said.

Thus the Soviet Polar expedition which drifted from the North Pole southward last winter to study weather and ice conditions, might have set up an automatic weather station and left it to do the laborious weather recording.

By the use of such instruments it would be possible for a radio weather station hundreds of miles away to contact the automatic weather observer, set it in action, and record its observations almost as easily as dialing a telephone number in a large city, the American meteorologist said.

Should such an instrument be drifting on an ice floe or on a special platform or boat, in which case the atmospheric conditions during hurricanes or other storms—never before fully recorded—might be observed, it would be simple to determine its position at sea almost exactly by observing the direction from which its signals come at two or more stations on land, Dr. Gregg added.

Feed Up With News

This Reporter Wanted To Think About Something Else

We just thought we would tell you that there are 18 nations in the world still at peace. A large number of automatic drive safety cars are coming out of the assembly lines yesterday. Several million Canadians are working and drawing regular pay cheques. We saw a man laughing this morning. The mango-wortle crop is high this year. Most people really like spinach. A girl and boy sat on a Victory Square bench at lunch-time yesterday, and just back of the world around as they looked in each other's eyes. This isn't news, but we thought we'd tell you. Sometimes we get so fed up with news that we like to stop and think of things like these—Vancouver Sun.

Operate Elevators

Many To Be Re-Opened After Having Been Closed For Years

Elevators in Alberta and Saskatchewan, some of them closed for years in the power crop districts, will be re-opened. W. H. Hildner, Calgary assistant commissioner for the board of grain commissioners, said recently.

According to information received by the assistant commissioner from Winnipeg office of the board applications for licenses have already been received to operate elevators closed "for many years."

A large number of the elevators are located at points where wheat and Saskatchewan's "dust bowl" and several in Alberta.

A recent society wedding which cost only a few thousand dollars was described as a quiet one. The mimosas, as you might say, were dead.

In a letter to a contemporary a young woman says that her baby son sings the popular melodies of the day in his cradle. At a woman's coronation glory is her heir.

Nothing Really Happens

What People Call Prieztight Does Not Mean Anything

There are all sorts of theories as to the fascination of prieztights, and no doubt most of them are correct. The most intriguing of them is the notion that most of us would like to hit somebody and don't dare. This supposed impulse is bad for us, though not so bad as giving way to it would ordinarily be. When we go to a prieztight we identify ourselves with one of the fighters. Then we identify the other fighter with the policeman who gave us a ticket, the man who shoved us aside in the subway, our employer, our voracious parent, who once spanked us unjustly, or perhaps with the New Deal, Wall Street, the capitalist system or the boy who went home from the church social 40 years ago with our best girl. We also make bets. Nothing makes one so vehement a partisan, or demands so little psychological analysis, as the act of laying a bet. Maybe the simplest explanation, as is often the case, is the best one. It may be immoral to win bets, but it is agreeable.

Setting all these considerations aside, a prieztight, or indeed almost any kind of athletic contest, has one supreme advantage. In a world in which at a time when almost all the news we get is fraught with significance, the prieztight doesn't matter. It doesn't mean that the Nazi philosophy is good or bad, that the Negro race is or is not rising in the economic scale, or anything else. It has to do with such elements as muscular strength, courage, indifference to pain, sense of balanced reaction, and the like, which may be combined in any member of any race at any time. The prieztight is a contest of the world is a business. Prieztighting is a business. The million-dollar crowd in the arena loses itself for a little while in enjoying the fight and that, tomorrow will be exactly what we really happen have been. Nothing has really happened.

Chose Same Location

One Chimney Swift Returns To Old Nesting Ground

The Canadian Resources Bulletin says that one Chimney Swift prefers to return to the same nesting site each spring. On October 31, 1934, at a place in Georgia, a Chimney Swift, which was migrating with many others on their way farther south for the winter, was captured with white enamel leg band No. 37,329. This bird was caught and released at its most near Sundridge, Ontario, about June 24, 1937, and was again captured and liberated at the same nesting location about June 3, 1938.

This swift must have been returning to wintering ground and vice versa. Comparatively little is known about the wintering ground of the Chimney Swift, but it is believed to be in the northern part of South America. Already many thousands of Chimney Swifts have been banded by ornithologists, in co-operation with both the Canadian and United States Governments, and perhaps banding may ultimately tell all about Chimney Swift travels. Other species of native wild birds have also been banded in great numbers with a view to obtaining exact information relative to their general life histories.

Memorial Scholarship

An Amelia Earhart Fund To Assist Young Women

An Amelia Earhart Memorial scholarship fund was established by Zonta International at its annual convention at Banff, as it was revealed the renowned aviatrix had indicated on doing all in her power to aid advancement of aeronautics.

Before voting to establish the fund, the last letter Miss Earhart wrote to the Zonta club, in which she believed, was read. Miss Earhart was lost in July, 1937, in the South Pacific while on a flight to Australia.

The memorial fund will be for assistance of young women engineering students having a special interest in aeronautics.

Ducks floating down the Niagara River frequently do not realize the speed at which they are drifting. Suddenly they are in the swirls near the brink of the Falls and go to their death, unable to fly out of the thundering waters.

G. Kennedy is celebrating his seventieth year as a singer in the Garrison Church choir in Windsor, England.

THE GREAT BIBLE

An original copy of the Chained Bible in the possession of St. Paul's Cathedral, London, which has been placed on view in the nave in commemoration of the 400th anniversary of the Royal Injunctions of 1538 ordering the Bible to be chained in churches.

For Happier Homes

Making The Husband Take A Hand

If a husband expects his wife, who is a job-holder, too, to cook the dinner, he should wash the dishes—and the result would be divorce depression and a boom in business, in the opinion of Mrs. Harriette Quisenberry, of El Paso, Texas, president of Altrusa International Women's Executive and Professional Club.

Here, she said, is how it would work out.

"Man, prone to look for the easiest way to do things, would quickly tire of washing greasy dishes and gray pans. He would go out and buy a mechanical dishwasher. Boom would go that business."

"And likewise would go the business in all work-saving gadgets, such as the latest thing in dishmops and grease cutters."

"A working wife would appreciate her spouse's recognition of his responsibility to help with the housework."

"That would make for happier homes and less divorce."

The Badge Of Office

English Barriester Sold His Wig Gave Him Confidence

When Lord Carnock, chairman of the House of Lords committee, suggested that barristers remove their wigs in the interest of comfort it was a hot day in London. Sir Patrick Hastings, who has been twice a member of Parliament, insisted on wearing the badge of position.

"I give you my word, it is a jockey belt it wouldn't sound as sensible," he explained.

It recalled Lord Bickenhead's judgment in the case of a barrister. "I could give you any sensible judgment in the case of a barrister, but it wouldn't sound as sensible," he explained.

There are no islands in the Pacific between Hawaii and the coastal region of America.

More than 30 different diseases germs and parasite worms can be carried by flies.

Modern Highway To India

Motorists Can Soon Travel In Comfort From Bombay To London

The Indian Empire Press Union states that a modern highway linking Great Britain, Belgium, Germany, Austria, Hungary, Yugoslavia, Bulgaria, Turkey, Syria, Iraq, Iran, Afghanistan and India will soon be an accomplished fact and it will be possible to motor in comfort 8,000 miles from Bombay to London.

A luncheon given by the West-Indian Automobile Association in Bombay, H. E. Ormerod, president of the association, said it was proposed that the road which at present had been completed as far as Istanbul, except for a short stretch, should be extended through Anatolia and Syria, and then on through Iraq, Iran and Afghanistan to India, and in this manner through Delhi to Calcutta and Bombay.

A. H. C. Sykes, secretary of the association, said that in 1933 the Automobile Association surveyed the whole length of the route from London to Istanbul in collaboration with a British car expedition. With the enthusiastic support of the Alliance Internationale de Tourisme, a group of motoring organizations having now an aggregate membership of over 10 millions, and with the hearty co-operation of the governments of the countries through which the route passed, the work of reconstruction and modernization was soon commenced. It has proceeded rapidly since and it is now possible to reach Istanbul from London in five days easy motoring.

Hints For The Thrifty

A book on thrift contains the following: "It is practical to change the points of one's shoe at least twice a week. This way you can double the lifetime of your shoelaces and save money." Also: "If the side of your box of matches are worn out while you will have a few matches in the box, strike the match vertically across instead of horizontally."

Use of baby carriages started about the middle of the 19th century.

Mexicana--Vivid Simple Stitchery

PATTERN 6085

Way down to Mexico we go for startling motifs to embroider on tea cloth, luncheon set, apron or towel! The most colorful from you can find. You'll do them in no time for they're mainly in single and outline stitch. Pattern 6085 contains a transfer pattern of 16 motifs ranging in size from 3 1/2 inches to 4 1/2 inches, 30 inches of 4 1/2 inch border color scheme. Illustrations of stitchery, machine needle, and thread.

To obtain this pattern send 20 cents to coin stamps cannot be accepted to: Household Arts Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

Empire Migration To British Dominions Is Urged By Overseas Settlement Board

In urgent phrase the Overseas Settlement Board recommended action to be taken without loss of time to encourage migration from the United Kingdom to the Dominion of Canada.

It dismisses any idea migration can be regarded as a solution for unemployment in the United Kingdom. From a careful survey of population trends the conclusion is drawn it is no longer automatic that extensive migration is in the interests of the United Kingdom if those interests could be considered in isolation from those of the Dominions.

The board was appointed in February, 1936, under chairmanship of the Marquess of Hartington, now the Duke of Devonshire, to advise the secretary of state for the dominions.

Its report pictures the Empire with a white population of 70,000,000, of whom about 40,000,000 are collected in the United Kingdom. While the total population of the world has expanded during the 20th century at greater rate than during the 19th, the population of the United Kingdom is growing older in comparison and unless the trend was reversed there would be almost inevitable decline in the population at the younger working ages and, therefore, of those available for migration.

The dominions generally also show a rapidly falling birth rate, although there has recently been a slight reversal of this trend. In Canada, the lowest death rate in the world, so their population, too, is steadily growing older. Serious unemployment is obvious from the social and economic life of the community and from the point of view of defence.

The report makes the novel suggestion that if the United Kingdom could supply the settler population numbers to provide all the additional population for which the circumstances of the world demand, the admission of a carefully regulated flow of foreign immigrants of assimilable type, preferably from those countries in which the population is originally from the same stock as ourselves and who share our outlook on life, has much to commend itself.

"The incorporation of assimilable settlers, whether of northern or other European extraction, would itself be not only the source of permanent enrichment to the life of the dominions but would at the same time increase their capacity for absorbing immigrants from this country," the report says.

"It should moreover, lead to increased trade between those countries whose immigrants go to the dominions in which they settle, and should thereby make a contribution towards what we regard as an urgent need of the world to make open door to trade and population."

The report recognized the policy to be adopted in regard to British European immigrants is entirely a question for the dominion governments.

Migration, it continues, should not be dealt with as a matter of bargaining. It should not be directly related to the question of increased markets for dominion produce, nor is it possible to set off introduction of immigrants against introduction of a given amount of capital.

Direct action on the part of the government of the United Kingdom or promotion of a flow of capital into the dominions would not be justified as a measure of migration policy. If opportunities for the investment of capital from the United Kingdom are to be created it must be the result of the action of the dominion governments themselves.

Rapid progress in secondary production in the dominions would have an important effect on the capacity of the dominions to absorb migrants from the United Kingdom. But every care should be taken so to direct any policy of assisted migration as to avoid giving the least cause for any apprehension on the part of Labor in the dominions that the standards of living are being endangered.

The board holds that assistance under the Empire Settlement Act should not be given to organized schemes of land settlement and development, save in very exceptional circumstances and only then if the dominion government concerned approve the scheme.

It is pointed out, it is a matter of attraction, not compulsion, and if the dominions are to obtain

the United Kingdom migrants they must be attracted by the conditions which will prove an attraction. Unemployment insurance and social services in the United Kingdom have created a sense of social security and stability which militates against the inclination to migrate.

An Important Problem

Canada Should See That Rural Churches Are Maintained

The St. Mary's, Ont., Journal-Argus sees keen in country communities changing, and tells this story: The average "country corner" to-day serves as an index of the change that has come over the rural community during the past generation.

In conversation with an aged lady who has spent her life in a neighboring hamlet, she recalled the other day that during her girlhood there were three taverns at the country corner. There were also three churches. To-day there are neither taverns nor churches. The country corner and wagon shop are gone but in this settlement, with a population of 100, there are more than three gas stations. To-day the farmers have cars to get about in and the changed condition does not deprive them of the service of the products sold by taverns which are within easy driving distance.

The institution that is really missed in the community, according to the lady, is the church. It is a source of comfort to the people, and church people could drive to town to church just as they come to town for other reasons, but the fact is that in the community in question only two or three families go to church. The neighborhood is made up of descendants of the farming population, and their parents were the pillars of the community church. They are benefiting in many ways from sound early training. But what about the children who are growing up in their homes? Are they losing touch with their parents' lack of connection with the Christian Church? If they are, and we surely think they are, in the next few years Canada will begin to pay dearly for its lack of solution of the rural church problem.

True Of Every Profession

Many Workers Are Just Square Pegs In Round Holes

We like the frank admission of James' Utility Minister in Ottawa, Rev. Mr. Craig, the minister of St. James' Presbyterian Church, who says in round holes, that the minister is "cluttered up with men in the wrong job," with unsuccessful preachers who might make good fishermen or farmers or carpenters.

But this is equally true of all professions. There are many lawyers who should have been preachers and preachers who should have been lawyers. There are journalists who would have been happier and more successful as soldiers or deep-sea sailors. There are farmers who have been accountants, and carpenters who should have been lawyers and fishermen who might have made great poets. Salmon who should have been physicians and physicians who should be merchants. There are innumerable square pegs in round holes.

And a remedy for the situation is not readily to be found. Stated by the speaker, it is a fact that in one year or two some hundreds of dollars at university, but he thinks it is too late to change his mind. He goes through with his plan, and whatever degree of success he may achieve he feels that he made a mistake. He can drop as easily into the wrong trade, and it is just as difficult for him to retrace his steps as for a fisherman to find himself a plumber instead of a sailor.

However there is this consolation: That if the preacher who regrets he isn't a lawyer had been a lawyer he might be mourning now that Providence hadn't guided him to the pulpit.—Ottawa Journal.

It is always profitable to have an approving scheme as the preface to an organizer. For one thing, it ensures that many wiles will come along, when otherwise they might not have followed.

Modern science knows that even the hardest stone is slightly elastic. And merchants know that a check written on the toughest paper can bounce back, too.

Help improve your personality with Wrigley's Gum. Keep your teeth white, breath sweet, by using beautiful Wrigley's. The children also love the delicious and refreshing flavor of Wrigley's Doublemint. Take them home today.

WHAT! HO!

CHAPTER XV.—Continued

She snatched the gilt-and-mirrored room. There was a profusion of Americans, a rich variety of Americans there, but not the one American she sought.

Lady Rosa took a table on the balcony commanding a view of the harbor, ordered a glass of sherry, a turbot bonnie fraise, and a salad, and kept watch. At a table below her a maid emerged from the shadow of a wine card as big as a baby's blanket; and then she did see a familiar face, her father's. Opposite him was Mrs. Clara Martha Phelps, looking twice as radiant as the girl, and smiling as happy. Lady Rosa restrained the temptation to drop a lump of ice on her sister's pate. If they saw her they'd ask her to join them and she did not feel that she was good company just then.

But a smacking sound made her turn. Behind her in a corner, alone in a table for four, a man was smacking his lips over a glass of Burgundy, and making ready to perform major operation on a steak of the size of a dictionary. The diner was rather sleekish himself, with a medium rare complexion, porthouse jaw, and a hamburger neck. On seeing Rosa he got up and rolled toward her, an avalanche of beef. Stopping at her table he said,

"Lady Rosa, my name?"

"Yes."

"Oh, yes, Mr. Bingley. I remember you, course."

"Where's that Yank?" Punder shot at her.

"I presume you mean Mr. Ernest Bingley."

"That's just who I mean."

"No," said Rosa, "I don't."

"What! You don't, hey? Does a bunk, has he?"

"He has left Bingley Castle, if that's what you mean, Mr. Punder, and I believe he is somewhere in London. I don't know where. I wish I did."

"So do I," said Punder. "If I lay my hands on that dirty, little beggar—"

"Mr. Bingley is neither dirty, little, nor a beggar," said Rosa, warmly.

"Hah! Ain't he?" said Punder.

"Quite the contrary."

"That's what you think, said Punder."

"It is."

"Well, you're wrong. He's a fella. He's an impostor. He's a nobody without a penny in his name," declared Punder.

"I'm afraid, Mr. Punder, your steak has gone straight to your head," said Rosa.

"Hah, hah, hah!" said Punder. "Well, one of my men just phoned me from Paris. He had a talk with O. G. Wyncop. Seneca Wyncop is hoping mad because he's a snail."

"What's that?" said Rosa, with an undesirable alien on account of what his kid did here. "Not?" threw in Mr. Punder parenthetically, "but old Wyncop isn't a robber himself!"

"I fail to see how this applies to Mr. Ernest Bingley."

"Oh, you'll see," said Punder. "The net of it is that Bingley is no more a millionaire than that fish on your plate. He's just a country bumpkin that stuffs pet canaries for a living in a village in Iowa, or Ohio, or Oklahoma or some such place. But

he's a sly cove, and he sold up his shop to come over here and try out some of his cute games on us slow Brits. Well, he took 'em in. To the tune of twenty thousand pounds—"

"Are you accusing Mr. Bingley of stealing?" asked Rosa, pale as the table-cloth.

"No. Not exactly," said Punder.

"He broke no law, or I'd set Redford Yard on him. It was a legitimate enough business deal, no shadier than many another. He caught me napping. Fooled Pete Tyler, too. Pete didn't lose anything, but I did. I don't mind the twenty thousand quid, of course, but I hate being stung. I got pride. And when I catch up with young Dunco Bingley he'll feel the weight of my beetle-squashers."

Mr. Punder brandished a size 12A shoe.

"Are you sure, Mr. Punder," said Rosa, quietly, "that Mr. Bingley has no money?"

"Of course he has," said Punder.

"Didn't I just tell you he short-changed out of twenty thousand?"

"I don't quite see why he made me hand over those notes instead of cash. Of course, by now, he's had them all counted, and has probably lit out for Paris."

"That's what you think," said Lady Rosa.

"Huh?"

"She did not explain."

"Of course he has," said "have you no idea at all where he might be?"

Punder began to wheeze with gusty laughter.

"What did the rascal do to you?" he asked.

"That's my affair, I think."

"My laughter shook the portly Punder."

"Borry, but I don't see the joke," said Rosa.

"Ho ho ho!" chuckled Punder. "That little knave doesn't miss a trick. Takes 'em all, high and low, and sends 'em off to the States."

"In the same boat, let's join forces."

"No, thank you."

"Well, well. I'll hunt and you hunt. But let's ally him first."

"You'll grind his bones to make your bread, I suppose."

"That's all I can do," roared Punder.

"That'll will, if you get on his track, just ring me up at my Park Lane lounge, will you?"

"Yes, if you'll notify me the minute you find him."

"It's a bargain."

"I'm staying with the Countess of Bathurst in Onslow Square," Rosa told him. "And now, Mr. Punder, would you better get back to your steak?"

"I expect to," said Punder. "Do you like hash?"

"Yes, just what I'm going to make out of E. Bingley," said Punder, and returned to his steak.

Lady Rosa was sipping her coffee when she heard a voice call out,

"You ho, Rosa, you ho!"

Her father, on his way out of the restaurant, had spoken at him.

"I'll come up," yelled the earl, to the surprise of the sedate diner.

Coming to the balcony he did, and Clara-Maria Phelps came with him.

"Rosa," he said, "meet your mother."

Mr. Phelps giggled.

"I mean to say," went on the earl, "he's going to be in a few months."

"Bless you, my children," smiled Rosa.

"We're to be married in Vienna," said the earl, "just as soon as Clara-Maria finishes her psychoanalysis. Then he'll for a honeymoon in Venice and back to the balcony he did, and the water the tulip bulbs."

"I congratulate you both."

Mr. Phelps placed a kiss on Rosa's cheek.

"I've always wanted a daughter," she said.

"I say," said the earl, "any trace of old Ernest?"

"I haven't found him," Lady Rosa said. "But I've found him out."

"That's all," said the earl. "Let me the answer quickly. We're late for the pants."

"Tell you later. Run along now."

"Come, daddy," said the earl, giving his arm to Mrs. Phelps.

"Yes, George-porgie," said Clara-Maria Phelps.

When they had gone, Rosa summoned her maid.

"Please tell Max that Lady Rosa Bingley would like to see him for a moment," she said.

"Very good, my lady."

Max presently approached her table. He had the air and profile of a superior entering Rome in a triumphal chariot. Max spoke nine languages and knew enough of the British nobility, it was said, to make a fortune by blackmail, if he was so inclined. He wasn't. He preferred to be the major domo at St. James's, he had a fortune.

"Good evening, my lady," he said.

"May I offer you my felicitations?"

"On what, Max?"

Must Choose Your Own

No Standard Diet For Arthritis According To Specialist

When a well known doctor, one moreover who specializes on the subject, says that "red" meat won't hurt you if you are rheumatically inclined, that's news. Dr. Douglas Taylor's pronouncement to that effect, made just before setting out to attend a convention in Halifax at which rheumatism was expertly discussed, should set the hearer on fire with a Pole.

For he has always been taught, generation after generation of us, that meat was bad for rheumatic subjects, and red meat something worse than merely bad. Every one who that way inclined, from the first crackly twinges to the stage of gnarled and burning joints, has been told by the family physician or the specialist-expert to cut from his diet certain things, chief among them red meats of every kind.

And now along comes Dr. Taylor and blows the rheumatic belief sky-high. There is, it appears, no such thing as a standard diet for arthritis. You work out your own diet, fitting your diet into your own brand of rheumatism—Montreal Star.

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.

TRY IT TOMORROW

"On the successful culmination of his lordship's romance."

"Max, you know everything," laughed Rosa.

"I regret I do not know where you can find Mr. Ernest Bingley," Max said.

"How do you know I want to find him?"

"A little bird—"

"Meaning my father?"

"Yes."

"Max, let me pose a question."

"Please do, my lady."

"Suppose you were in London—"

"I am."

"And broke—"

"I have been."

"What would you do? Where would you go?"

"Meaning me, or a hypothetical character?"

"Meaning a young American."

Max gave thought to the matter, and he was Thibaut considering a matter of state.

"He is without funds," he queried.

"Practically. Nothing but a return ticket to the States, if that."

"What I did," said Max, "when I first came to London as a young man, and a very poor young man, was to sit on a bench on the Thames Embankment and plan how to become a rich one. On the benches there, my lady, one finds many who were rich, and some who are going to be."

"I'll try there," said Rosa, getting up.

"Surely not alone?"

"Yes."

"It is a vile thing."

"No matter. Thank you, Max."

"Always at your service, my lady."

Rosa paid her bill and stepped into the fog.

(To Be Continued)

No Insects Allowed

Trans-Atlantic Airlines To Have Sprinkling System For Pests

Bugs will not be permitted to hitchhike on the Trans-Atlantic Airlines, the United States Commerce Department said. A report from the American commercial attaché at London said that Imperial Airways has developed an insecticide sprinkling system designed to rid aircraft of all insects pests. Imperial Airways and Pan American Airways are to inaugurate joint service between Great Britain and the United States this fall.

Outsides Of Yesterday

During an intermission at a party, some prominent business men were discussing an absent member. Few could find anything pleasant to say about the person in question. The guest, who had worked his way to success up the ladder of many mistakes and failures, said, "That reminds me of about 20 words I once memorized from Dr. Isaac Goldberg's 'Tin Pan Alley': 'Snobbery is but a point of time. Let us have patience with our inferiors; they are ourselves of yesterday.'"

Underground Post Office

South Australian Opal Field Has Only One In World

Cooper Pedy, the remote South Australian opal field, possesses the only underground post office in the world. The prospectors live "rooms" dug into the soft earth of the low sandstone hills. Here, too, is the bank and their post office. Cooper Pedy, is the aboriginal name for white man's burrow.

Must Be Acquired

Good Taste Grows From Effort To Appreciate The Best

C. E. M. Road, in Berlin's, states good taste is not instinctive, but acquired. All native tastes are bad. The taste of the young in music is abominable, in literature execrable. Good taste grows slowly through the effort to understand what is beyond us, the endeavor to appreciate what we cannot yet understand. It depends on our willingness to be bored with what is good in order that we may become bored with what is bad and so demand something better. In short, it is born of the faith that the kingdom of beauty can neither be purchased by dollars nor taken by storm, but must be approached by a process of trial and error, a willingness to learn, and the humility which is prepared to accept on faith and the judgment of others what it cannot yet dare to reject on its own.

Provided New Words

Several Things Have Been Named After English Peers

According to the New York Evening Magazine those amiable Englishmen named to the newspapers have discovered a new one this year: Namely, that English peers have had their names turned into new words in the language? One begins, of course, with the Earl of Sandwich, who wouldn't leave the gaming table, ordered some meat between bread slices brought in, and achieved an unexpected fame thereby.

But there are apparently quite a lot of others, including the seventh Earl of Devon, who got a sweater named after him, the Duke of Wellington, who ended up as a pair of boots and a cooking apron, and a certain Lord who gave a general name to a Ruglan, who turned out to be an overcoat.

The Streamlined Potato

Will Have No Deep Eyes And Be Easier To Peel

The work of the professional plant breeder is not designed to aid the farmer alone. "Streamlining" of cereals has been followed by the idea of the streamlined potato. Such a variety is one of the chief goals of potato specialists everywhere.

This streamlining is the elimination of deep eyes that cause such waste during peeling. Besides being more economical, the newer shallow-eyed varieties may be peeled with greater speed.

Like the streamlining of cars, the elimination of deep eyes in potatoes is a gradual process. Our latest varieties are improvements, but not shallow eyes may be expected in later models—Scientific American.

Feet Hurt?

It is reported that a light spring of rain makes the average road one third more slippery than a drizzling rain.

Might Reverse Decision

Question Whether Judge Would Apply Case To Himself

A recent legal decision in the United States has fallen upon jaded sports writers like manna from heaven. It appears that the umpire at a ball game in a West Virginia town called a strike. The batter felt differently about it, made a verbal protest and followed it up with a punch on the nose. The umpire took the case to court.

After hearing the testimony, the judge dismissed the case with the remark, "It is the inalienable right of a baseball player to get mad and have a fight with the umpire."

The judge has had his little day; but we are wondering what his reaction would be if some litigant in his court exercised his inalienable right to get mad at a decision and take a punch at the judge himself. Perhaps it might occur to the umpire's league to make a test case.

Winnipeg Tribune.

Railroads Of Tomorrow

Freight Trains Will Travel Faster Than To-day's Passenger Trains

Pullman Advertisement says the to-morrow of railroading will open up a new world. For not only will high speed, high-powered, bullet-nosed, streamlined trains be cutting through dormitory after dormitory, but the merchandise of the world will also be carried at a speed far greater than the ordinary passenger train. Their top traveling to-day. For your freight trains, too, will be lightweight, modern carriers, travelling with the speed of the wind.

Water, remarks a traveller, always appears to be much nearer than it is. Evidently he has never looked at it from the top of a high diving-board.

First American fighting ships were ordinary merchantmen, with space cleared for guns.

RELIGION AND POLITICS

(By Rev. W.H. McDONNOLD)

We cannot, this argument has maintained, preserve Freedom and Tolerance and human dignity and opportunity on merely humanitarian assumptions. These are the creations of Christianity. Only from it has come compassion and reverence for human dignity. "In Him was life and the life was the light of men."

The price of liberty is eternal vigilance—but more over ourselves than over others. "If we keep on letting our Christian standards go in thought and act, if we keep on asking 'What is comfortable?' not 'What is right?' we may wake up one morning to discover that Freedom and Faith have taken wings together." "The world must choose," Mr. Eden said. Which is it to be? Christ? Destruction? In this choice there can now be no neutrality. Even if we suspended judgment our decision is thereby made. To stay aloof without commitment is to be against Christ.

I believe that the things Christ stands for are the real things. We must openly witness. We are witnessing now for we make flesh the things we really believe in. "The hour has struck when after terrible struggle, after unpopularity, after persecution, after the death of Christ in the Christianization of the world and its passage through all the results of that process, Christianity will be revealed in its pure form. . . . Christianity will again become the only and final refuge of man. And when the purifying process is finished, it will be seen that Christianity stands for man and for humanity, for the value and dignity of personality, for freedom, for social justice, for the
